### DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

#### *Claim Objections*

2. Claims 1-11 are objected to because of the following informalities:
  - a) In claim 1 lines 10-11: It is unclear what is meant by "...traffic is transmitted by utilizing the universal cross-connections produced by the network element itself...". It is suggested to reword the phrase to (for example): "...traffic is transmitted by utilizing universal cross-connections conveying the message traffic between the cross-connection part and the control part...".
  - b) In claim 2 lines 3-5: It is unclear what is meant by "...traffic is transmitted by utilizing the universal cross-connections produced by the network element itself.". It is suggested to reword the phrase to (for example): "...traffic is transmitted by utilizing the universal cross-connections conveying the message traffic between the cross-connection part and the control part...".
  - c) In claim 8 line 4: It is unclear what is meant by "...utilizing the universal cross-connections produced by the network element itself.". It is unclear because claim 8 is dependent on claim 7, and claim 7 states that a universal cross-connection is established between the sending unit computer and the receiving unit computer (lines 9-10).

d) In claim 11 lines 10-11: It is unclear what is meant by "...traffic is transmitted by utilizing the universal cross-connections produced by the network element itself...". It is suggested to reword the phrase to (for example): "...traffic is transmitted by utilizing universal cross-connections conveying the message traffic between the cross-connection part and the control part...".

Appropriate correction is required.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
